

7.6.0 Release Notes

Last Modified on 06/08/2025 1:13 pm ACST

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Major Features

Charts

Experimental feature: This is not generally available to all customers at this time, and is subject to further revision.

Main article: [Charts](#)

Further improvements, with a focus on fluid charting and performance.

Care Plans, Schedule & Shift Handover

Experimental feature: This is not generally available to all customers at this time, and is subject to further revision.

For overnight hospitals, we are extending the system to better understand *what care and when* is required.

Care Plans - CareRight now features the ability to set flexible schedules; such as *perform an assessment at 9am, 4pm on Monday, Wednesday, Friday*. The specific activities or care to be provided can be organised prior to admission, with a dedicated Care Plan assessment or similar; and turned into a schedule.

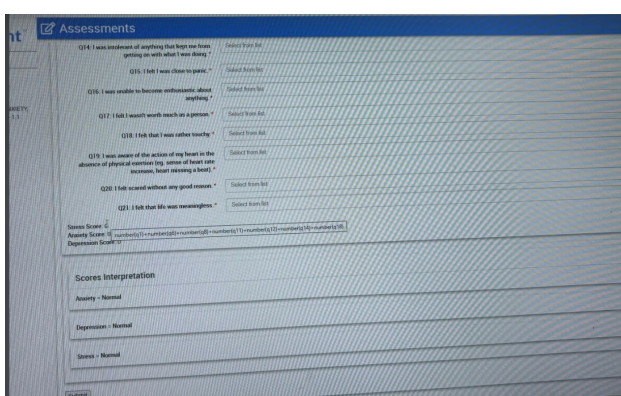

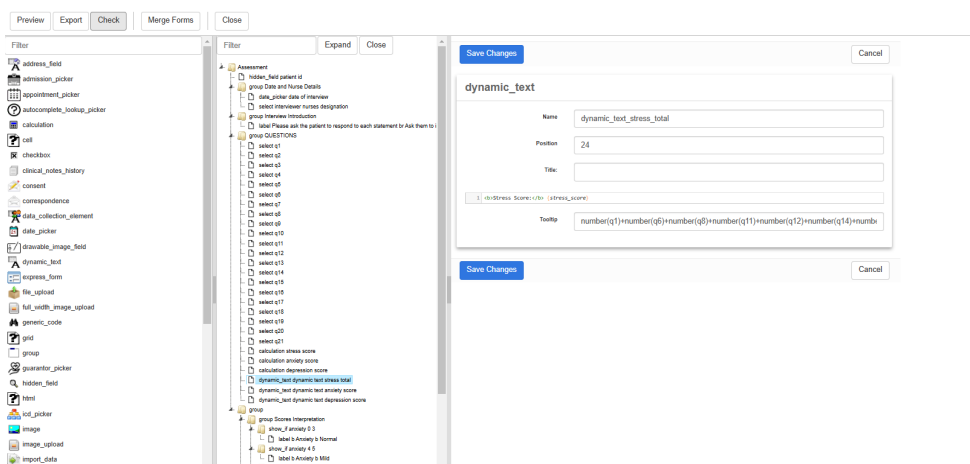

Shift Handover - Suggested assessments and charts now know their *due date*; and the location occupancy screens now support a preview of the next 72 hours of care.

Your browser does not support HTML5 video.

Enhancements

Assessments > Tooltip and Placeholder support

Where an assessment element, ie a calculation should provide a clinician with an explanation of the methodology, this can now be facilitated via *tooltips*.

Additionally, the methodology for a specific assessment can be recorded in a new *Citation* area.

Next; many assessment elements now support placholders.

Prescribing > Rewritten to avoid iframes and search improvement

The current medications and prescribing user interface has been rewritten to a slightly more modern style. While the experience will be broadly the same, the underlying structure has been modernized.

Search has also been improved to more quickly locate specific drug amounts, ie "Panadol 500" would surface Panadol in a 500mg dosage; rather than all variants of Panadol.

Invoices > Bulk Print

Bulk printing invoices now runs in a background worker; to reduce the performance impact when printing several hundred invoices at once.

All Receipts / All Refunds over time

(TBA)

Patient Portal > Secure Logins

 **Experimental feature: This is not generally available to all customers at this time, and is subject to further revision.**

Initial versions of the patient portal, supporting user authentication are experimentally available.

Admin > Auditing > Automatically display recent modification audit logs to technical staff

While running an Audit report provides the full detail; for better tracing of recent changes we have surfaced the existing audit information in a number of areas in the administration user interface.

This will be improved further, to show more detailed audit logs of related items over time.

Defects & minor enhancements

- Rewrite prescribing UX to avoid use of iframes
- Support bundle on view patient > referral - ActionView::Template::Error: Practitioner (XYZ) has no professional category set app/models/professional_contact.rb:257:in 'is_specialist?'
- Significant referral system test coverage and maintenance
- Minor correspondence system maintenance
- Setting a patient to deceased now defaults to "not emailable", "not smsable"
- Fix issue with copy preadmission/bed reservation
- Remove unused/legacy Public Hospital Batch Account code
- Search IHI: IRN will be mandatory for a Medicare Card Search.
- Search IHI: If the HI Service finds a unique match to the IHI record with a 'Retired' status, the HI Service will return informational message (#02270), with the IHI details, depending on the configuration.
- Fix patient metric field labels
- Fix Admission > Display Hidden Fields > Admission FIM Scores are now mandatory, even if 'hide FIM' is ticked.
- Admin > Enquiry Categories > Ability to set a redirect-after-completion URL
- Fix gap in datasets with primary provider
- Ensure hospital provider numbers validated when claiming an IHC transfer (Error The request failed: DHSEIN 5: Invalid string: the minimum length must be at least 8 (got only 7).)
- Fix minor crash in MedicareOnline - DVA Processing report - Reprocess
- Fix Print Account balance with \$0 balance
- User Profiles > Default patient page > Allow selection of image gallery
- Usability enhancements when copying preadmissions
- Covi link does not generate for online appointment confirmed after stripe payment
- Admin > Service Providers > Ability to Archive/Restore
- Handle repeat prescription when drug missing from MIMS due to withdrawal or renaming errors
- Improve MIMS Drug search when a drug strength is indicated

Release Notes for CareRight 7.6.1

Defects & minor enhancements

- Fix delete assessment merge forms attachment checks
- Handle the attachment name is nil when encode
- Fix Online Booking load more slots issue
- Fix render issue with currency formatter

Release Notes for CareRight 7.6.2

Defects & minor enhancements

- Fix PRODA setup bug
- Security fix for <https://nvd.nist.gov/vuln/detail/CVE-2025-25291> and <https://nvd.nist.gov/vuln/detail/CVE-2025-25292>
- Trigger wrappers > Appointments > Handle changing status to cancelled better
- Customer specific change to a billing wizard
- Add consent for Upload My Health Record to assessments (patient fields)
- Dashboard > Appointments > Optimize and skip security checking of previous/next appointments, as we are only looking for the date
- Fix escaping of database name in SQL Server specific database migration to set compatibility level
- Avoid crash on unexpected medicare response status
- Avoid crash on printing error
- Disable Patient Account > Account statement printing on unsupported configurations

Release Notes for CareRight 7.6.3

Defects & minor enhancements

- Fix minor bug with trigger script based PDF attachment rendering
- Fix online booking "No appointments available" message

Release Notes for CareRight 7.6.4

Defects & minor enhancements

- Add various phone notes fields to acceptable list
- Add waitlist at location level
- Restrict MHR to ECDHE-RSA-AES256-GCM-SHA384 ECDHE-RSA-AES128-GCM-SHA256
- If given an appointment where can_validate? is false, calendar_session_type may be nil
- Fix class call issue
- Customer specific billing wizard changes

Release Notes for CareRight 7.6.5

Defects & minor enhancements

- Fix bug comparing admissions with a missing date field
- Show doctors, allergies on various admission lists
- Fix pagination for professional contacts
- Patient > Admissions > Show admission category
- Add tooltip to "currently admitted", showing category
- Swap student SAML authentications to be inactive professional contacts
- Adjust bulk billing consent UI
- Fix minor bug in stripe error handling
- Adopt CSV sanitisation library
- Fix allocation to ignore reversed items
- Add trigger script capability for attachment conversion to patient documents
- Fix bulk bill override not showing on item

Release Notes for CareRight 7.6.6

Defects & minor enhancements

- Change default settings to 'paranoid' mode for devise.
- Increase limits for professional contact selection on appointments to 50,000 despite performance impact
- Support Online Enquiry redirection configuration
- Fix SQL Server compatibility migration/database name escaping

- User Management > Lock accounts 45 days after last sign in
- Admin > System images > Show size
- Assessments > Stacked Layout > Mark deprecated
- Appointments > Anaesthetist > Include blank option
- Appointments > Details > Render other theatre information
- Dashboard > Add group tasks
- Appointments > Professional Contact Pickers > Swap to an autocomplete
- Correspondence Header - Avoid crash if provider not specified.
- Fix missing document.gif problems
- Datasets: Permit "." in names for workflow models, and fix a number of other bugs.
- Bulk Billing Consent - Make name/signature fields required
- Fix edge case with malformed HL7 payload causing crash
- Make name and signature input mandatory in bulk billing consent

Release Notes for CareRight 7.6.8

Defects & minor enhancements

- **Security > Fix inconsistency of location access checks at list view vs individual object view**
- Fix regression with referral assessment snapshots missing correspondence column
- Fix regression with appointment edit

Release Notes for CareRight 7.6.9

Defects & minor enhancements

- Fix bug in document status on handling uploaded attachment from assessment

Release Notes for CareRight 7.6.10

Defects & minor enhancements

- Fix bug in image upload of assessments
- Fix add archived_at to patient demographics report
- Fix ordering bug
- Add concurrent check for enquiry assessment
- Add pronouns as tooltip
- Render as tooltip
- Show calender session anaesthetist when choose yes

Release Notes for CareRight 7.6.11

Defects & minor enhancements

- Fix HL7 healthlink rendering if no medicare / dva add Careright identifier
- Fix ordering issue with healthlink HL7 rendering with multiple CC'd recipients
- Fix notice for receipt share by email
- Fix display pdf Letter after virus scan
- Avoid crash on upload of letter to MHR without provider
- Ensure discharge removes bed allocation
- Improve performance for location occupancy
- Fix Revenue Report regression from security library
- Fix on screen display of assessment save buttons
- **Security: Fix edge case in error handling with online enquiries**

Release Notes for CareRight 7.6.12

Defects & minor enhancements

- Add concurrent check to workflow assessment
- Appointments > Cancel/Delete > Entitlements > Fix incrementing
- Assistant translation
- fix date range not showing for saved report

- fix issue about failed to join episode
- Fix the assistant selection field not displaying by default for appointment

Release Notes for CareRight 7.6.13

Defects & minor enhancements

- Feature/#111542 Limit Send & Print buttons for Correspondence (#7532)
- fix create and open location, and add include_close to location tage
- Correspondence > Copy letter to start new one (#7394)

Release Notes for CareRight 7.6.14

Defects & minor enhancements

- Healthlink/Medical Objects - Fix professional contact xad rendering with no address.
- Fix enquiry report on postgres when concatenating
- Remove pagination from patient events screen

Release Notes for CareRight 7.6.15

Statutory Reporting 2025

ICD-10 13th Edition

Warning: This version still ships with ICD 10 AM 12th Edition, due to a pending licencing discussion. We expect to resolve this prior to any production release / 1st July 2025.

CareRight now ships with an updated ICD 10 version, suitable for coding of admissions from 1st July 2025.

<https://www.iacpa.gov.au/resources/icd-10-amachiacs-thirteenth-edition>

Diagnosis Cluster Identifiers (DCID)

<https://www.iacpa.gov.au/health-care/classification/icd-10-amachiacs/cluster-coding>

<https://meteor.aihw.gov.au/content/793121/Print?templateMode=Technical>

When coding an admission, a new DCID data entry input is available.

Where there are multiple clusters, subsequent diagnoses can be added to new clusters.

Hospital Casemix Protocol (HCP) reporting

We've reviewed and updated CareRight's HCP reporting in the following areas:

- HCP 2025: Update to AR-DRG versions, to allow v12 to be selected
- HCP 2025: Mode of separation and Provider Number of Hospital to which transferred
- HCP 2025: Birth weight of infant, neonate, stillborn
- HCP 2025: Front end deductible (not applicable)
- HCP 2025: Sex
- HCP 2025: Care type
- HCP 2025: Other changes

As a general reminder and following communications by AHSA, we'd like to encourage customers to ensure they review the configured **HCP Codes for guarantors** against the published guides.

<https://hospitals.ahsa.com.au/hc/en-au/articles/20563171395225-AHSA-fund-codes>

VAED

We've reviewed and updated CareRight's VAED reporting in the following areas:

- VAED 2025: Add new Admitting/Discharging Unit/Specialty codes for Early Parenting Centres
- VAED 2025: Add code 999 to Triage Score on Admission
- VAED 2025: NDIS Participant Flag – reported by mental health care types
- VAED 2025: Add Diagnosis Cluster Identifier (DCID) for implementation in 2025-26

Note that VAED changes to **palliative care data modelling have introduced new fields** specifically:

- In an Admission, where PCOC data capture is **not used**, *Primary PCOC Phase Type* is now relabelled *PCOC Phase Type at Admission*; and continues to report as it did previously. A new field, *PCOC Phase Type at Separation* is available.
- Preferred Place of Death, distinct from the existing Place of Death is required by VAED over and above the PCOC v3 standard.
- Leave Days can be manually entered, where appropriate in a PCOC Phase. This is not directly linked to admission leave.

ISAAC/APC

- ISAAC/APC 2025: Add Diagnosis Cluster coding
- ISAAC/APC 2025: ICD 10 13th Edition

TSMS

- TSMS 2025: Gender vs Sex
- TSMS 2025: ICD 10 Changes, DCID

QHAPDC

- QHAPDC 2025 : Report DCID
- QHAPDC 2025 : ICD-10 13th Edition

HMDS

- ICD 10

PHISCO

- ICD-10-AM / ACHI / ACS Thirteenth Edition Implementation

PCOC v4

Not available

Defects & minor enhancements

- Fix Assistant translation
- Fix the assistant selection field not displaying by default
- Limit Send & Print buttons for Correspondence
- Correspondence > Copy letter to start new one
- Fix professional contact xad rendering with no address
- Fix enquiry report sql issue
- Unlimited patient events
- Fix create and open location regression
- Statutory Reporting > Ability to generate a preview or subset of upcoming submission

Release Notes for CareRight 7.6.16

ICD-10 13th Edition

Licencing resolved.

Customers are encouraged to discuss with their coding teams any relevant changes, and new **Diagnosis Codes** that may apply from 1st of July.

These can be updated via **Admin > Admission > Episode Diagnosis Codes**.

Grouper Plus Content Services

Updated to 2025.1.3.

Admission > Diagnosis

Minor usability enhancements to reduce errors, and to make subsequent diagnosis clusters slightly easier to manage when adding in bulk.
