

7.8.0 Release Notes

Last Modified on 06/08/2025 1:23 pm ACST

About this Release

In each release there may be new features and functions that require one or all of the following:

- Purchase of a module to access
- User Training
- Specific process to be used to ensure the correct functioning

Please read the release notes and the corresponding manual pages to ensure that you understand the changes being made, what module they are associated with, and how they impact your business processes.

If you have any questions about anything in a release, please contact support either by phone or through a Redmine ticket.

Enhancements

Medicare Errors > One click ways to learn more, with AI assistance

We've annotated a number of system errors with one-click ways to understand more about what is being communicated, building on the wealth of knowledge publicly available.

Calendar system > Updated core javascript libraries and theme

As part of our ongoing modernisation, users will notice user experience changes to the calendar component. Functionality should be identical to previous, with visual styling changes.

Reservation was successfully created.

Secure notifications are sent to users after updates to authentication details

Increasing the security of our product, users will receive notifications when core details change or when a new login from an unrecognized location occurs.

This functionality requires SMTP configuration.

Assessments > Builder > Layout "Stacked"

This layout methodology is a legacy rendering approach, and we are phasing it out. If any assessments are in use, we encourage you to change them to Horizontal layout.

A system health check has been added to alert of enabled assessments using this functionality.

This is a published assessment - changes will affect already approved assessments.

Standardisation

Users and Groups > Ability to bulk lock and disable accounts and automatic lock after 45 days inactivity

For customers dealing with large numbers of rotating staff, we have added the ability to automatically lock inactive accounts after 45 days of no activity and easier tools for administrators to deprovision.

Locations > Waitlist

We've provided extra navigation to access the waitlist from a location level.

Discharge Planning > Discharge Letters

We've added more explanatory text to better distinguish between the two use cases of letters.

Administration > Accounting Setup

We've made a few minor revisions to the core accounting administration UX, to make it easier to get up and running.

[Dashboard](#) / [Administration](#) / [Accounting](#)

Accounting - Main Choices

Configure the application wide choices for how your organisation's accounting practices work.
Want to know more? Check out the [System Admin - Accounting](#) article.

Pricing by Region

Manage your **pricing** for various **items**, across **regions** (if operating in more than one location); and **rates definitions** (ie: Private vs MBS), applicable from a given date.
For example, if you charge \$200 for a 104 Consultation item to Private patients from the 1st of July, this can be managed here.

Index	Name	Download Date	Override?	
1	MBS	12/08/2011	•	<div>ShowRegion Prices</div>

Administration > Admissions setup

We've made a few minor revisions to the core accounting administration UX, to make it easier to get up and running. In particular, we'd recommend our hospital customers review the **Admission Warnings** functionality to see if it is suitable for your processes.

Admissions

Dashboard / Administration / Admission

Admission Categories

You have not yet defined any specific admission categories. Did you want to **define your admission categories**?

Diagnosis Codes

Manage [45106 codes](#)

Procedure Codes

You have not yet defined any procedure codes. Did you want to **define your typical coding**?

Behaviour

Configure system wide **Admission** settings.

- Is your discharge process relatively straight forward, needing minimal discharge planning or coordination between teams? Set **Auto Confirm Discharge** to true.
- Does your discharge process happen promptly? For example, in a day surgery context? Set **Admission Default Discharge Date To Current Date** to true
- Do key admission details need to be finalised before discharge, such as theatre time? Set **Admission Data Collection At Discharge** to true

Auto Confirm Discharge

false ▾

Admission Default Discharge Date To Current Date

true ▾

Admission Data Collection At Discharge

false ▾

User Interface

Change the behaviour of the user interface.

- Display Admission Warnings** - prompt users if admitting without performing a recent OEC, or without capturing key financial details. Recommended for most private hospital customers.
- Show Inpatient/Outpatient status** - system will indicate when service locations are inpatient or outpatient in various select controls.
- Show Legacy Admission Fields** - displays historical data from previous Careright versions. Not recommended for most customers.
- Hide Invoices on Admission screen** - hides accounting controls on admissions, useful for when admission and financial teams are completely isolated roles.

Admission: Display Admission Warnings

true ▾

Administration > Task types

Task type

EditBack

Dashboard / Administration

Task Types help you model key administrative and clinical activities. We recommend focusing first on key safety related tasks, where task completion needs to be tracked and audited in detail (user assignment); then expanding to more general administrative or team based tasks (location or group assignment).

Task Type

Code	Billing
Name	Finalise Billing
Enabled	Yes
System	No

Behaviour

Allow User Assignment?	Optionally allows
Allow Location Assignment?	Optionally allows
Allow Patient/Contact Assignment?	Optionally allows
Limit Assignment of Tasks to Group	HD Test Group
Limit Task Creation to Group	

History

No history available.

Admin > Global Settings > Security > Ability to force 2FA for password based users

Main article: [Setting up Two Factor Authentication \(2FA\)](#)

Security Options	
Force 2fa For Password User	<input type="button" value="false"/>
Location Restrict Patient Correspondence	<input type="button" value="true"/>
Location Restrict Patient Documents	<input type="button" value="false"/>
Same Site Cookie	<input type="button" value="Strict"/>
Session Time Out	<input type="text" value="60"/>

Defects & minor enhancements

- Restrict when an individual is consider contactable; so that if they are deceased notifications are not sent.
- Add CSV sanitisation library
- Fix ActiveRecord::RecordNotFound: Couldn't find Appointment errors on deleting a reservation twice
- Metrics - fix associations
- Care Plans: Remove activity alerts, warnings (Legacy concept)
- Appointments > Details > Render other theatre information
- Check active calendar_session_type for location can delete
- Patient Portal > Ability to login and manage my own profile
- Patient Portal > Do not allow access beyond the dashboard/devise controllers until I set up 2FA
- Admin > Workflow > Numerous minor UX improvements
- Datasets: Permit "." in names for workflow models, and fix a number of other bugs.
- Bulk Billing Consent - Make name/signature fields required
- Fix edge case with malformed HL7 payload causing crash
- Fix fetch emma residents link in patient header
- Render admission edit history to technical support
- Fix metric notes with legacy assessments
- Fix 115586 - UI must match data
- Improve flash message role layout
- Add group tasks to dashboard

- Add tooltips to tool_field_definition
- Add tooltips to transfer_field_definition
- Add helper for generate schema changes with input version
- Add quick and dirty AI generated script for... AI code generation
- Add working diagnosis AI generated title attributes
- Admin > Custom Templates > Handle errors
- Admin > Generic Codes > New > Fix header usage

- Admin > System images > Show size
- Admin > Users > Bulk Disable > Swap from .any? to count
- Admin > Workflow > Trigger classes > Add basic specs
- AI generated transport title attributes
- Allow patient account to set 2FA
- Allow user to create patient portal account in patient profile page
- Appointment List > Fix crash where a provider has no person record
- Appointments > Details > Render other theatre information
- Appointments > Include blank option
- Appointments > Use HTML5 validation instead of legacy jquery validate
- Assessments: Stacked Layout - Mark deprecated
- Better explain finalise
- Care Plans: Remove activity alerts, warnings
- Chart: Ability to 'mark in error'
- Check active calendar_session_type for location can delete
- Codespell: More spelling
- Contacts > New > Ensure Medicare IRN has title, maxlength, etc and validates properly
- Correspondence > Download HL7 when there is no message > Avoid crash
- Correspondence: Lock down UI slightly more
- Discharge Letters > Improve letter UX
- Document Clinical Note - Discipline
- Enhance patient trigger script to allow filtering latest appointment by status
- Feature/assessment check metric target
- Feature/assessment check metric target
- Handle legacy assessments enabling metric notes
- FIM Scores: AI generated title attributes
- Fix ActiveRecord::RecordNotFound: Couldn't find Appointment errors
- Fix Admin > Metrics Thresholds UI
- Fix appointment spec
- Fix calendar function for move appointment to waitlist
- Fix code style issue
- Fix codespell yml
- Fix correspondence current assessment list search issue
- Fix Cron for lock inactive patient account
- Fix fetch emma residents link in patient header
- Fix group tasks query for MSSQL
- Fix patient user trigger wrapper issue
- Fix Rails 6.1 warning
- Fix term search for current assessment list

- Fix undefined method issue for convert document in trigger script
- Force patient to reset account password for new patient portal account or updated by provider/admin user
- GFA Billing Wizard (1.1)
- Hashrockets cleanup (app/views/)
- Location > Activities > Flip the order of Fri 00:00 to 00:00 Fri so that rendering is consistent.
- Lock inactive users after 45 days: Change to configuration
- Make name and signature input mandatory for patient portal invoice signature
- Medicare Batches: Remove duplicate coverage
- Medicare: Refactor mark failed to partial
- Metric notes additional
- Metric: Fix associations
- NoMethodError: undefined method `invoice' for nil:NilClass in app/services/mcol/cache_era_claim_summary.rb:26
- Patient Portal > Automatic lock of external accounts after a year since last sign in
- Patient Portal > Patient Users > Edit my basic demographics and contact details
- Patient Portal > Require 2FA
- Patient Portal w/Login - Be able to revoke a communication related token
- Patient Users > Add trigger wrapper support
- Patient Users: Notify on user email change
- Program Schedule > Max enrolments > Specify Minimum
- Rails 6: ActionMailer::MailDeliveryJob
- Rails 6: Active storage.queues.analysis
- Rails 6: Active storage.queues.purge
- Rails 6: Collection cache versioning
- Rails 6: Replace on assign to many
- Rails 6: Return false on aborted enqueue
- Rails 6: return_only_media_type_on_content_type
- Rails 6: Use cookies with metadata
- Rails/inverseOf: app/models/estimate and app/models/erx_link
- Refactor correspondences assessments list UX
- Refactor to avoid ArgumentError: Relation passed to #or must be structurally compatible.
- Remove drug_lists generic table, unused outside of gen3 migration
- Remove migration that is covered by db/seeds: MOLPayees Generic Table
- Remove tags from application (1 of 2)
- Results, Correspondence > Convert to PDF > Handle filesystem issues
- Rubocop - Rails/InverseOf - app/models/available_time_zone.rb
- Rubocop - Rails/inverseOf - room, bed, location
- Rubocop: Rails/LinkToBlank

- Rubocop: RedundantPresenceValidationOnBelongsTo
- Stripe > Receipts > Avoid NoMethodError: undefined method
- **Security > Fix inconsistency of location access checks at list view vs individual object view**
- Totalling metric spec fix
- Waitlist > New > Fix open in new tab
- Waitlist > New appointment > Swap to opening in a new tab, so we don't have to redirect back using complex logic
- Fix Contacts > New > Can key in invalid Medicare details
- Fix Healthlink - MSA.3 Invalid message structure
- Change the "assistant" picker to an AJAX control in appointments - session configured anaesthetist

Release Notes for CareRight 7.8.1

Defects & minor enhancements

- Fix bug in image upload of assessments
- Fix HL7 healthlink rendering if no medicare / dva add Careright identifier
- Fix ordering issue with healthlink HL7 rendering with multiple CC'd recipients
- Fix display pdf Letter after virus scan
- Avoid crash on upload of letter to MHR without provider
- Improve performance for location occupancy
- Fix Revenue Report regression from security library
- **Security: Fix edge case in error handling with online enquiries**

Release Notes for CareRight 7.8.2

Statutory Reporting 2025

ICD-10 13th Edition

CareRight now ships with an updated ICD 10 version, suitable for coding of admissions from 1st July 2025.

<https://www.iacpa.gov.au/resources/icd-10-amachiacs-thirteenth-edition>

Diagnosis Cluster Identifiers (DCID)

<https://www.iacpa.gov.au/health-care/classification/icd-10-amachiacs/cluster-coding>

<https://meteor.aihw.gov.au/content/793121/Print?templateMode=Technical>

When coding an admission, a new DCID data entry input is available.

Default Diagnosis Cluster identifier (DCID)

To create additional clusters, save and add a **New Diagnosis**

Diagnoses

- ✕ A00 (ICD - Disease) Cholera
- ✕ A00.9 (ICD - Disease) Cholera, unspecified
- ✕ A01.1 (ICD - Disease) Paratyphoid fever A
- |

Where there are multiple clusters, subsequent diagnoses can be added to new clusters.

Hospital Casemix Protocol (HCP) reporting

We've reviewed and updated CareRight's HCP reporting in the following areas:

- HCP 2025: Update to AR-DRG versions, to allow v12 to be selected
- HCP 2025: Mode of separation and Provider Number of Hospital to which transferred
- HCP 2025: Birth weight of infant, neonate, stillborn
- HCP 2025: Front end deductible (not applicable)
- HCP 2025: Sex
- HCP 2025: Care type
- HCP 2025: Other changes

As a general reminder and following communications by AHSA, we'd like to encourage customers to ensure they review the configured **HCP Codes for guarantors** against the published guides.

<https://hospitals.ahsa.com.au/hc/en-au/articles/20563171395225-AHSA-fund-codes>

VAED

We've reviewed and updated CareRight's VAED reporting in the following areas:

- VAED 2025: Add new Admitting/Discharging Unit/Specialty codes for Early Parenting Centres
- VAED 2025: Add code 999 to Triage Score on Admission
- VAED 2025: NDIS Participant Flag – reported by mental health care types
- VAED 2025: Add Diagnosis Cluster Identifier (DCID) for implementation in 2025-26

Note that VAED changes to **palliative care data modelling have introduced new fields** specifically:

- In an Admission, where PCOC data capture is **not used**, *Primary PCOC Phase Type* is now relabelled *PCOC Phase Type at Admission*; and continues to report as it did previously. A new field, *PCOC Phase Type at Separation* is available.
- Preferred Place of Death, distinct from the existing Place of Death is required by VAED over and above the PCOC v3 standard.
- Leave Days can be manually entered, where appropriate in a PCOC Phase. This is not directly linked to admission leave.

ISAAC/APC

- ISAAC/APC 2025: Add Diagnosis Cluster coding
- ISAAC/APC 2025: ICD 10 13th Edition

TSMS

- TSMS 2025: Gender vs Sex
- TSMS 2025: ICD 10 Changes, DCID

QHAPDC

- QHAPDC 2025 : Report DCID
- QHAPDC 2025 : ICD-10 13th Edition

HMDS

- ICD 10

PHISCO

- ICD-10-AM / ACHI / ACS Thirteenth Edition Implementation

PCOC v4

Not available

Statutory Reporting > Ability to specify a date range

Prior to submission to a statutory reporting authority, a limited preview can be generated.

HMDS Report

Start Date 01/01/2019 

End Date 31/01/2020 

End Date must be within the same financial year 30/06/2019

New Message

Location Melbourne 

Message Type Code asthma treatment plan 

Subject: Asthma treatment plan test

Beverly This test will provide a score that may help the doctor determine if your child's asthma treatment plan is working or if it might be time for a change
Your appointment is booked for on at Melbourne , 1 Test St.

[Save as Draft](#) [Help](#)

Defects & minor enhancements

- Fix Assistant translation
- Fix the assistant selection field not displaying by default

- Limit Send & Print buttons for Correspondence
- Correspondence > Copy letter to start new one
- Fix professional contact xad rendering with no address
- Fix enquiry report sql issue
- Unlimited patient events
- Fix create and open location regression
- Statutory Reporting > Ability to generate a preview or subset of upcoming submission
- Appointments > Cancel/Delete > Entitlements > Only increment if we are below the total
- add concurrent check to workflow assessment
- Assessments > Yes/No > Fix the usage of readonly vs read_only
- Only perform enabled assessments
- Fix cancelled/archived chart assessment data stays in the chart
- Admission > Shift handover assessment > refactor to the helper
- fix date range not showing for saved report
- Fix crash on mapping MIA
- Patient Portal > Ensure auditing is aware of person users

ICD-10 13th Edition

Licencing resolved.

Customers are encouraged to discuss with their coding teams any relevant changes, and new **Diagnosis Codes** that may apply from 1st of July.

These can be updated via **Admin > Admission > Episode Diagnosis Codes**.

Grouper Plus Content Services

Updated to 2025.13.

Admission > Diagnosis

Minor usability enhancements to reduce errors, and to make subsequent diagnosis clusters slightly easier to manage when adding in bulk.

Additional	I10 (ICD - Disease) Essential (primary) hypertension	A	Present	2	Edit	Delete

Defects & minor enhancements

- Add "Another term" to other stat reports
- Admission > Shift handover assessment > refactor to the helper, show
- Always show primary_phase_type and separation_primary_phase_type for
- Fix crash for service location not assigned to location
- Fix crash on malformed frequency
- Fix order and active tag issue
- Fix professional contacts disabling
- Fix term search
- Fix to show fields if @episode.is_palliative_care?
- MHR discharge_summary doesn't need contact details
- NoMethodError: undefined method `invoice' for nil:NilClass
- Patient Accounts > Enquiries > Print selection of invoices
- Statutory Reporting > Ability to generate a preview or subset of admissions

Release Notes for CareRight 7.8.3

Defects & minor enhancements

- Ensure stat report preview allowed in future
- Fix admin > grouper certificates display
- Fix crash with malformed care plan frequency
- For group location assignments, default to including non open locations
- Fix crash on referral warning with professional contacts who lack professional category.
- Fix HCP values for pre 1st July 2025 admissions vs post 1st July 2025 admissions for mode of separation
- Remove admission date sorting from location occupancy for older SQL Server customers

Release Notes for CareRight 7.8.4

Defects & minor enhancements

- Added Patient Relationship Demographics Standard Report
 - Assessments > Handle health fund field error and show warning when edit
 - Alert Notices > Fix broken HTML
 - Fix the primary-form-controls covering the assessment content
 - Fix invoice restriction issue
 - Enquiries > Add archived_at as a public attribute
 - eRx > upload custom drugs without coding systems
 - Render patient banner for workflow models index page
 - Add create patient button to letters as well as document
 - Add order for bed reservation page
 - Make concurrency warning sticky, fix z-index
-
